

An Internship Report
Of
Community Teaching & Social Outreach Programme

Submitted

To

School of Computer Science and Engineering
IILM University, Greater Noida, U.P.

In partial fulfilment of the requirement of degree of
B-Tech (CSE)

By

Roll Number of Student : 25SCS1003000720

Name of Student : NIKHIL MANI TRIPATHI

Batch: 2026-27

CANDIDATE'S DECLARATION

I, NIKHIL GODARA, do hereby declare that the internship report titled "Community Teaching & Social Outreach Programme" has been completed by me to fulfil the requirement for the award of the degree of Bachelor of Technology in Computer Science and Engineering. All the references have been quoted and I have not taken as such any material from any other source. I affirm that this report is my own and has not been submitted to any other institute for any degree/diploma requirement, and further I shall be solely responsible for any kind of copyright violation in this regard.

Roll No.: 25SCS1003000720

ACKNOWLEDGEMENT

I am using this opportunity to express my gratitude to everyone who supported me throughout this internship. I am thankful for their guidance, encouragement and constant support during this journey.

I would like to express my heartfelt thanks to Ms. Sarita, our mentor at the NGO, for her constant guidance, patience and encouragement throughout the internship. Her supervision and the trust she placed in our group made this experience truly meaningful, and I am sincerely grateful to her for giving us such a joyful and enriching opportunity to learn and contribute.

I am also thankful to Mahila SewaShakti Foundation for providing my group and me the opportunity to be a part of this social internship and for allowing us to interact with and teach the children at their centre. I am equally grateful to my institute, IILM University, Greater Noida, and the faculty of the School of Computer Science and Engineering, for their continuous support and encouragement.

I express my gratitude to my parents for their blessings, and to my fellow group members for their teamwork and cooperation throughout the internship.

4. PROJECT DESCRIPTION

4.1 Introduction

This report presents a detailed account of the social internship undertaken with Mahila SewaShakti Foundation as part of the requirement of the Bachelor of Technology (Computer Science and Engineering) programme at IILM University, Greater Noida. Unlike a conventional technical internship, this was a group social internship in which our team was given the responsibility of teaching students studying in Classes 1st, 3rd and 5th at the foundation's centre.

The internship was structured around weekly teaching sessions of two hours each, conducted on every consecutive Monday of the month, during which our group worked directly with the students to strengthen their academic foundation and help them improve in subjects such as Mathematics and language skills. The overall aim of the internship was not only to contribute towards the education of these children but also to develop our own skills in communication, patience, teamwork and social responsibility.

4.2 Organization Profile

Mahila SewaShakti Foundation is a non-governmental organization (NGO) working towards the welfare, empowerment and education of underprivileged communities, with a special focus on women and children. As part of its education-support initiatives, the foundation runs a learning centre where students from nearby areas, many of whom lack access to consistent quality schooling, are given additional academic support. The foundation depends on student volunteers and interns to conduct remedial classes, mentor the children, and help bridge the gaps in their learning.

4.3 Problem Statement

A large number of children studying at the foundation's centre come from economically weaker backgrounds and do not always have access to consistent schooling, guidance, or academic support at home. As a result, many students lag behind the learning level expected for their class. The internship was designed to address this gap by providing focused, small-group remedial teaching to students of Classes 1st, 3rd and 5th, and to help identify and support students who were struggling the most.

4.4 Objectives of the Internship

- To conduct engaging and effective teaching sessions for students of Classes 1st, 3rd and 5th.
- To assess the existing academic level of each student and identify learning gaps.
- To help students improve their basic reading, writing, and mathematical skills.
- To build confidence among students and encourage active participation in class.
- To work collaboratively as a group of interns under the guidance of the NGO mentor.
- To develop soft skills such as patience, communication, empathy and responsibility through direct social interaction.

4.5 Scope of the Internship

The scope of this internship was limited to conducting in-person teaching sessions at the Mahila SewaShakti Foundation centre, once every week on Mondays, for a duration of two hours per session, spread across one month. The sessions covered foundational subjects including Mathematics (counting, tables, multiplication and division) and language skills, tailored according to the individual learning level of each student rather than strictly following the standard classroom curriculum.

4.6 Teaching Methodology and Activities Undertaken

Our group followed a hands-on and student-centric teaching approach. Each session began with a quick assessment of what the students remembered from the previous week, followed by focused teaching using the whiteboard, one-on-one doubt-clearing, and group activities. Since the students belonged to different classes and different learning levels, we divided ourselves within the group so that each intern could focus on a smaller group or an individual student, ensuring that no child was left behind.

Topics covered included number counting, multiplication tables, basic division and multiplication word problems, and language and reading practice. We also encouraged students to solve problems on the board themselves, which helped build their confidence and gave us a clearer picture of their individual understanding.

4.7 Observations

One of the most striking observations during this internship was the wide variation in the academic level of the students, even within the same class. While teaching, we found that some of the students were exceptionally smart, quick to grasp new concepts, and already possessed knowledge beyond their grade level. On the other hand, we came across certain students in Class 5th who were not even familiar with basic Class 1st level subjects and curriculum, such as simple counting and basic reading.

This gap highlighted the real, on-ground challenges faced by underprivileged students who do not get consistent access to quality education. It also made us realize the importance of individualized attention rather than a one-size-fits-all teaching method. Some students were shy and hesitant to speak up initially but gradually became more comfortable and participative as the sessions progressed. Overall, the experience taught us that patience and consistent encouragement can make a visible difference in a student's willingness to learn.

4.8 Session-wise Schedule

The table below summarizes the broad structure of the weekly sessions conducted during the internship.

Session	Class Group	Focus Area / Activity
Session 1 (Monday, Week 1)	Class III – Remedial	Introduction : assessment of existing reading, writing and number skills; basic counting and place value (1000–1500 range counting).
Session 2 (Monday, Week 2)	Class III & V – Combined Remedial	Mental maths practice (multiplication and division problems), Hindi reading.

Session 3 (Monday, Week 3)	Class I, III & V – Group Teaching	Table learning (14, 15, 16, 17, 18, 19 tables), basic division and multiplication word problems, handwriting practice.
Session 4 (Monday, Week 4)	Class I, III & V – Review & Consolidation	Recap of topics covered, one-on-one doubt clearing, encouraging weaker students, small oral tests to track improvement.

4.9 Learning Outcomes

- Gained practical, hands-on experience in teaching and mentoring children from underprivileged backgrounds.
- Learned how to identify and adapt to different learning levels within the same group of students.
- Developed patience, empathy, and effective communication skills through direct interaction with children.
- Understood the value of teamwork by coordinating with fellow interns to manage a diverse group of students.
- Experienced a strong sense of satisfaction, joy and personal fulfilment through the act of teaching and contributing to the education of the students.

Beyond the academic objectives, this internship left a lasting personal impact. Teaching these children and watching them slowly improve, gain confidence, and enjoy learning was an extremely satisfying and joyful experience. It gave us a deep sense of purpose and pleasure to know that our efforts, even over a short span of a month, could make a small but meaningful difference in the lives of these students.

5. CONCLUSION

This social internship with Mahila SewaShakti Foundation was a truly enriching and eye-opening experience. Working as a group to teach students of Classes 1st, 3rd and 5th allowed us to step outside the conventional technical scope of our degree and contribute meaningfully to society. It taught us that education is not just about delivering a fixed curriculum, but about understanding each student's individual needs and helping them grow at their own pace.

I am extremely thankful to Ms. Sarita, our mentor at the NGO, for her constant guidance and support, and for giving us the opportunity to be a part of such a joyful and rewarding experience. This internship has left me with valuable memories, a deeper sense of social responsibility, and a genuine appreciation for the effort that goes into teaching and shaping young minds.
